The California Air Resources Board and the Orange County Market Place present
A Drive Clean California
Advanced Technology Vehicle Test Drive Event
March 2, 2008 9:00 a.m. – 3:00 p.m.

Get behind the wheel of some of the newest hybrids, compressed natural gas and super clean gasoline vehicles, ranging from sport cars to SUVs. The first 500 participants get a free pass to the Orange County Market Place!

More than 95 percent of Californians live in areas that fail to meet federal or state air quality standards – and motor vehicles cause more than half of the air pollution in California. Vehicle choice has a direct impact on air quality, global warming, energy stability and the health of the environment we leave our families.

Car buyers have more vehicle choices now than ever before. Buying a cleaner vehicle these days doesn't mean settling for less. In fact, advanced technology vehicles often require less maintenance and provide greater fuel economy, while offering the same performance and luxury features as traditional gasoline vehicles.

To prove this to you, the California Air Resources Board is teaming up with the Orange County Market Place to host an advanced technology vehicle test drive on March 2, 2008.

Don't miss your chance to check out one of the easiest ways to positively impact our community!
